

# 7 reasons why Objective Connect is the platform of choice for UK Government

Secure external file sharing and collaboration, designed specifically for local and central government and regulated industries.

# Secure and effective collaboration that government depends on

Objective Connect is a secure, ISO-certified platform, purpose built for government agencies needing to share sensitive information externally.

Such organisations, bound by legislation to ensure strict information management guidelines are adhered to, can maintain control over shared documents, collaborate across devices and have a complete record of who did what and when, all from one solution.

Here's why over 200 organisations trust Objective Connect to deliver secure file sharing and collaboration for them.

# Activities scanning of files up to 2GB in size Authenticated Single Sign-On Two-Step Verification

Objective Connect is rigorously tested and assessed to ensure the highest standards of security over your information.

# Maintain a single source of truth when collaborating

==

## Never question if you're working on the latest version.

Upload a new document version or tweak content in a Microsoft 365 Online Edit session - all updates are reflected in Objective Connect as a new version.

# Grant seamless access for trusted partners

# Don't let administrative bottlenecks slow you down.

Workspace Owners can provide or revoke sharing access of Participants in seconds, limiting the need to engage with IT for on or offboarding of externals.

### Set permissions by collaboration event

Customise access to files on a case-by-case basis.

Set individual abilities per Participant including:

- Ownload of documents
- Upload of documents
- Uploading of new document versions
- Ability to edit documents using Microsoft 365
  - Inviting and removing Participants

Adding comments

### **Protect your most sensitive information**

Secure your most critical information assets by applying additional security on collaboration features.

- Preview-Only documents are watermarked with the Participant's email address, time and date stamp and Workspace name
- Edit, but no download allows for online editing, but download to a local machine is blocked

### Generate instant audit reports generated in seconds

# Know exactly who did what and when at anytime.

Workspace Owners have complete visibility and traceability of actions:

- View All Activity on screen
- Produce a Workspace Record in seconds
- Retrieve a detailed audit in CSV format
- Receive instant alerts when a user acts
- Analyse usage and activity with Admin reporting

# Administration enabled while information is protected

# Keep your PROTECTED information for intended eyes only.

Administrators can report on who is doing the sharing or creating a Workspace but doesn't automatically have access to PROTECTED

documents.

### **Objective Connect is trusted by all levels of government**

County Council

Middlesbrough

# When you need to know who did what, and when.

Designed specifically for government and regulated industries, Objective Connect is a secure ISO 27001 Certified external file sharing application that gives complete control over the information you share outside your organisation.

Extend your internal information governance externally. Maintain control over shared documents. Collaborate across devices, across teams or across the world. Maintain one version of the truth. Record who did what and when. All from one solution.

For a further breakdown of why Objective Connect is the secure file collaboration application of choice by government, download the <u>Objective</u> <u>Connect for Public Sector Deep-Dive</u>.
